- »» Emergency and critical care
- »» Downer
- »» Dermatology
- »» Vaccine and vaccinology
- »» Dialysis
- »» Infectious diseases

#### Venue : Namakkal, Tamil Nadu, India

Namakkal is situated at 11° 00' and 12° 00' of the North latitudes and 77° 40' and 78° 05' of the East longitudes. The altitude of the Namakkal district is 300 meters above Mean Sea Level (MSL). Namakkal town popularly called as "Egg City" is the district headquarters and is a large commercial center for the transport and motor vehicle body building. Among animal husbandry activities the chicken layer industry is well established with a massive population of more than 40 million birds in this zone. This town lies at and around the foot of a hillock of NH-7 (Varanasi to Kanniyakumari National Highways) 55 Km from south of Salem on the way to Madurai and Trichy by road.

In Namakkal, there are two rock cut cave temples located on both side of a hillock dedicated to Lord Shri Lakshmi Narasimha and Shri Ranganatha. The Hanuman temple houses the largest Hanuman statue (18 feet) which is the greatest pilgrimage spot of the town. The district has a number of tourist sites of interest such as Kolli hills waterfalls, Tiruchengode Aarthanareeswarar hill temple, Namakkal fort Kailasanathar temple. Besides these Trichy city (85 Km), Yercaud hills station (90 Km), Tanjore (140 Km), Madurai (185 Km), Ooty hill station (225 Km), Kodaikanal hill station (260 Km), Kanniyakumari (315 Km) and Rameswaram (320 Km) are the nearest pilgrimage and tourist places of interest in Tamil Nadu. The

Kolli hills, the Garden of Namakkal district is having an area of 371.03 sq.km at an altitude of 1300 mts. above MSL.

Occupation of majority of the people of this district apart from poultry and motor vehicle is rearing of dairy cattle. This fact accounts for the huge turnout of large animals' in the Veterinary College and Research Institute Teaching Hospital, Namakkal.

#### CLINICAL FACILITIES

The clinical units of VCRI hospital serves as a referral centre for Namakkal and nearby districts. It provides special diagnostic facilities like endoscopy, ultrasonography, ECG, diathermy, cryosurgery and dental scaling for large and small animals. In addition contrast radiographic facilities, computed radiography (CR), C-Arm, physiotherapy, large animal reproductive ultrasonography, infertility clinic and inhalant anesthetic facilities are available. All sort of clinical
